DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 9/13/04 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.

Response to Declaration Under 37 CFR 1.131

2. The declaration filed on 11/12/2004 under 37 CFR 1.131 has been considered but is ineffective to overcome the Kinoshita (US PG-Pub 2003/0152125) reference.

The evidence submitted is insufficient to establish diligence from a date prior to the date of reduction to practice of the Kinoshita reference to either a constructive reduction to practice or an actual reduction to practice. While the evidence submitted establishes a conception of the invention prior to the effective date of Kinoshita, it has failed to establish diligence from a date prior to the date of reduction to practice of the Kinoshita reference to either a constructive reduction to practice or an actual reduction to practice as no supporting evidence of any activity between the dates of 11/2/2001 and the filing date of the instant application has been submitted to show the facts to be such, in character and weight, as to establish due diligence. Original exhibits of drawings or records, or photocopies thereof, must accompany and form part of the affidavit or declaration or their absence satisfactorily explained.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Kinoshita US PG-Pub 2003/0152125.

Kinoshita discloses in figs. 1-6 a surface emitting semiconductor laser chip or VCSEL (as in claim 6), comprising: a semiconductor body having, at least partly, a crystal structure with principal crystal directions or [1 0 0] direction (as in claim 9), a radiation exit face, and side faces 60°/60° laterally delimiting said semiconductor body, at least one of said side faces disposed obliquely with respect to the principal crystal directions.

As for claim 2, Kinoshita discloses semiconductor body having a rectangular cross sections disposed parallel to said radiation exit face.

As for claims 3 and 7, Kinoshita discloses a principal crystal directions including a given direction running parallel to said radiation exit face, and at least one of said side faces forms an angle, within the range recited in the claim, with said given direction.

As for claim 4, Kinoshita discloses (see claim 3) a semiconductor body containing a substrate 1 having, at least partly, a crystal structure.

As for claims 5 and 8, Kinoshita discloses semiconductor body containing a III-V compound semiconductor or GaAs (as in claim 8).
